

MORRILL AIR VENTS

AV series aluminum air vent are used on gravity (or higher pressure systems and are designed for evacuation of air when filling a pipe line. The air vents also provide positive vacuum relief when draining the system.

- Precision ground solid float ball seats against an extra thick precision O-ring providing a tight seal at very low pressures.
- Air vents operate trouble-free up to 150 psi (for 2") and 120 psi (for 3").
- Aerodynamic air-flow design assures maximum vent capacity without premature closing.
- Material selection prevents "sticking" in the closed position.
- End connection is with standard Female pipe threads.

ALUMINUM AIR VENTS				
PART NO.	SIZE	MAX OPERATING PRESSURE	VENT CAPACITY	VACUUM RELIEF CAPACITY
AV0150	1-1/2"	150 psi	1.79"	1.13" Clear Opening
AV0200	2"	150 psi	2.25"	1.75" Clear Opening
AV0300	3"	120 psi	3.33"	2.38" Clear Opening
AV0400	4"	120 psi	4.33"	3.50" Clear Opening
